

askelie for Education Smarter, faster, and more engaging student and staff experiences through intelligent automation

For Students

- Faster onboarding and enrolment with digital checks
- Instant answers to course, timetable, and submission queries
- Greater confidence in support services and university processes

For Academic Staff

- Reduce manual workload by up to 60%
- Eliminate dependency on spreadsheets and paper submissions
- Free capacity for teaching, mentoring, and research

For University Leaders

- Gain insights into student demand, course loads, and compliance risks
- Demonstrate commitment to quality, inclusivity, and ESG reporting
- Improve reputation with a modern, student-first experience

Executive Summary

Universities and training providers face growing complexity in managing large student populations, diverse coursework submissions, and strict compliance requirements. Traditional onboarding and academic administration depend on manual processes, paper forms, and disconnected systems. The result is slower onboarding, increased staff workload, and reduced student satisfaction.

askelie for Education is an autonomous-ready solution built on the Ever Learning Intelligent Engine (ELIE). It automates student onboarding, enrolment, course matching, and coursework intake, while embedding compliance and record-keeping at every stage. With conversational AI, students and staff get instant answers, while human-in-the-loop validation ensures accuracy and trust.

The result: students enjoy faster responses, staff spend more time teaching, and institutions improve compliance, efficiency, and reputation.

The Education Landscape Today

Common Challenges Facing Universities and Training Providers

- **Onboarding bottlenecks:** Enrolling thousands of students in weeks creates delays and errors
- **Manual coursework handling:** Staff overwhelmed by submissions and validation tasks
- **Compliance risk:** Right-to-study, accreditation, and data protection requirements add complexity
- **Resource drain:** Skilled academic staff tied up in administration instead of teaching
- **Student frustration:** Lack of quick answers reduces satisfaction and engagement

Benefits You'll See

- Cut student onboarding timelines by up to 70%
- Free staff capacity by automating coursework processing
- Improve student satisfaction with instant support
- Strengthen compliance with auditable, automated record-keeping
- Enhance institutional reputation with a modern, efficient experience

Quick Summary

askelie for Education delivers:

- Faster student onboarding
- Always-on AI support for course and admin queries
- Automated compliance and record-keeping
- Seamless integration with academic and student systems

Where askelie Fits In

askelie flips the model. Instead of more systems for staff to manage, universities get outcomes delivered straight from ELIE.

- **Onboarding** – Automates enrolment, course allocation, and right-to-study checks
- **Coursework** – Intake, validate, and store submissions with structured audit trails
- **Support** – Conversational AI answers queries instantly, reducing ticket backlogs
- **Compliance** – Ensures policies, data protection, and accreditation rules are met
- **Analytics** – Gives leaders real-time insights into student trends and academic workload

Regulatory Pressure

- Right-to-study and visa compliance requirements
- Data protection and GDPR standards for student data
- Higher education accreditation and audit frameworks
- Institutional ESG and inclusivity reporting obligations

Risks of Standing Still

- Student dissatisfaction from slow enrolment and poor support
- Compliance failures leading to fines or reputational damage
- Staff burnout from repetitive admin
- Missed opportunities to use student data for better planning

Why askelie for Education

- Ready-made: Prebuilt services that work from day one
- Scalable: Handles growth, multi-campus, and global student bases
- Secure: Meets the highest data governance and privacy standards
- Human-centred: Designed to support both staff and students naturally, not as another system to manage

Staff get more time for teaching.
Students get the support they expect.
