

# askelie for Legal Smarter, faster, and more efficient case management through intelligent automation

## For Paralegals

- Reduce manual admin workload by up to 60%
- Automate repetitive intake and document checks
- Free capacity to focus on case support and research

## For Lawyers

- Gain instant insights into case risk and suitability
- Ensure faster client onboarding with fewer delays
- Improve decision-making with AI-driven case analysis

## For Legal Firms & Leaders

- Increase case throughput without increasing headcount
- Demonstrate compliance and evidence-based processes
- Build stronger client trust with faster service delivery

## Executive Summary

Legal professionals face mounting pressure to deliver faster services while reducing costs. Traditional case management relies on manual client onboarding, slow risk assessments, and inconsistent triage of inbound queries. Valuable hours are lost to admin instead of client service.

askelie for Legal is an autonomous-ready solution built on the Ever Learning Intelligent Engine (ELIE). It automates client onboarding, suitability scoring, case progression, and public enquiry triage. Conversational AI provides instant access to case data, while the Decision Engine assesses risks and suitability. Human-in-the-loop validation ensures trust and compliance.

**The result:** paralegals and lawyers spend less time on admin and more time serving clients, firms increase case capacity, and leaders gain clear insights into risks and opportunities.

# The Legal Landscape Today

## Common Challenges Facing Legal Teams

- Onboarding delays: Manual collection of client documents slows service delivery
- Risk blind spots: Suitability and case risk assessments vary by lawyer, reducing consistency
- Admin overload: Paralegals stuck on repetitive intake tasks instead of case prep
- Inefficient triage: Too many hours spent filtering public enquiries and unsuitable cases
- Client frustration: Delayed responses reduce confidence in firm reputation

## Where askelie Fits In

askelie flips the model. Instead of manual admin, firms get outcomes delivered straight from ELIE while still using their existing case management system.

- Onboarding & Packs – Issues requests, collects responses, and chases documents automatically
- Risk & Suitability – Decision Engine scores enquiries against legal criteria and firm priorities
- Client Updates – Automated progress updates reduce “where’s my case?” calls
- Case Management Integration – Works alongside existing systems, adding automation and validation without replacement
- Knowledge Base – Provides AI-driven access to case law, client records, and precedent

## Benefits You’ll See

- Cut admin workload by up to 60%
- Reduce onboarding timelines from weeks to days
- Improve case selection with AI-driven triage
- Handle more cases with the same team size
- Increase client satisfaction through faster response and delivery

## Regulatory Pressure

- GDPR and client confidentiality obligations
- Legal sector compliance with SRA / ABA standards
- Anti-money laundering and “right to act” checks
- Evidence and audit requirements in case handling

## Quick Summary

askelie for Legal delivers:

- Faster client onboarding
- Automated risk assessment and suitability scoring
- Smarter triage of public enquiries
- Seamless case progression and tracking

## Risks of Standing Still

- Lost revenue from poor case triage and missed opportunities
- Non-compliance with legal and regulatory standards
- Lawyer and paralegal burnout from repetitive workload
- Client attrition due to slow responses and poor experience

## Why askelie for Legal

- Ready-made: Prebuilt services for legal case management automation
- Scalable: Handles client enquiries and cases across multiple practice areas
- Secure: Meets the highest standards of governance, privacy, and confidentiality
- Outcome-driven: Reduces admin, improves client service, and grows case capacity

Lawyers get more time for clients.  
Firms get the cases that matter.
