

IntELIEdocs

The worlds leading AI based IDP platform

Many business applications are driven around the need to capture content be that from humans or other data repositories. Trying to capture that data across diverse applications is both expensive and complex.

intELIEdocs is the world leading AI based IDP platform on the market offering the ultimate in classification, extraction & content summary capability. The solution is easy to deploy, cost effective, requires little training and deployed in minutes

Many old school capture solutions requiring expensive consulting to define the classification and extraction models. Many of these legacy capture tools mostly focussed on invoices leaving more complex content or lower-level volume documents to manual input.

Many organisations are left with multiple capture solutions and expensive SaaS or consulting bills to define classification or extraction models

IntELIEdocs is offered in:

- Pay per use model with discounts for volume loads
- Monthly contracts for fixed volumes
- Private cloud option from \$1,500 USD
- OEM Model for software providers. POA

Features

Any industry, Any documents & Any extraction

No code Model creation for Classification, Extraction & summary of content

Multi-model creation for different personas enhancing GDPR security

Validation Interface for 100% accuracy
