

Contract intELIEgence Smarter, faster, and more compliant contract management through intelligent automation

For Procurement Teams

- Reduce manual workload by up to 60%
- Eliminate dependency on spreadsheets and manual reconciliation
- Free capacity for supplier performance management and strategic sourcing

For Business Leaders

- Gain immediate insights into contract costs, risks, and obligations
- Ensure consistent compliance across all contracts and suppliers
- Strengthen negotiation leverage with accurate performance data

For Legal & Commercial Teams

- Standardise positions and reduce back-and-forth with counterparties
- Improve visibility of obligations and change requests
- Build stronger confidence in governance and risk management

Executive Summary

Organisations depend on contracts to run their operations, but contract management remains slow, fragmented, and costly. Traditional processes rely on manual reviews, scattered spreadsheets, and disconnected systems, which delay onboarding, increase compliance risk, and limit visibility.

Contract intELIEgence is an autonomous-ready solution built on the Ever Learning Intelligent Engine (ELIE). It automates contract onboarding, change requests, validation, and performance monitoring while embedding compliance and ESG checks at every stage. Conversational AI enables instant queries, and human-in-the-loop validation ensures accuracy and trust.

The result: procurement, legal, and commercial teams gain immediate insights, business leaders reduce risk, and organisations improve compliance, auditability, and efficiency - all while cutting costs.

The Contract Landscape Today

Common Challenges Facing Contract Teams

- Data silos: Contract data fragmented across emails, PDFs, and legacy systems
- Compliance burden: ESG documentation, policy checks, and audit trails increase admin overhead
- Duplication risk: Multiple versions of the same contract cause disputes and confusion
- Missed opportunities: Renewal dates and performance tracking often overlooked
- Time drain: Highly skilled legal and procurement staff tied up in repetitive validation work

Where askelie Fits In

askelie flips the model. Instead of more tools to manage, teams get outcomes delivered straight from ELIE.

- Onboarding – Automates supplier contracts and ESG document checks, complete with validation and duplicate detection
- Change Management – Tracks, validates, and automates workflows for contract variations and approvals
- Compliance – Ensures every contract meets regulatory and ESG requirements, with full audit trails
- Performance Monitoring – Captures KPIs and renewal data, providing leaders with real-time insights

Benefits You'll See

- Cut contract admin workload by up to 60%
- Reduce onboarding timelines from weeks to days
- Improve compliance with automated ESG and policy checks
- Keep full audit trails of contract changes and approvals
- Free legal, sales, and procurement teams to focus on value creation

Quick Summary

Contract intELIEgence delivers:

- Faster onboarding and change request cycles
- Always-on AI support for contract queries
- Automated compliance and ESG validation

Regulatory Pressure

- ESG disclosure requirements (UK, EU, US)
- Supply chain transparency and anti-slavery laws
- GDPR and data protection obligations within contract data
- Industry-specific compliance (e.g. financial services, healthcare, public sector)
- ISO 27001, ISO 20400 sustainable procurement standards

Risks of Standing Still

- Missed renewals leading to higher costs and lost leverage
- Compliance gaps creating financial and reputational exposure
- Contract duplication causing disputes and wasted effort
- Teams stuck in manual, low-value tasks instead of strategic work

Why Contract intELIEgence

- Ready-made: Prebuilt services that deliver outcomes from day one
- Scalable: Handles thousands of supplier and sales contracts across regions
- Secure: Meets the highest governance and privacy standards
- Outcome-driven: Reduces cost, improves compliance, and increases efficiency

Teams get more time for deals.
Contracts get managed the way they should.
