

Your documents are slowing you down. Not any more.

intELIEdocs replaces costly, fragmented capture tools with a single AI platform that classifies, extracts and summarises any document — automatically. No consultants. No code. No compromise on accuracy.

ANY INDUSTRY

SOUND FAMILIAR?

Expensive to set up, expensive to change

Legacy tools need consultants to build models — then charge again every time you add a new document type.

Built for invoices and nothing else

Most capture tools handle one document type well, leaving everything else to slow, error-prone manual entry.

A different tool for every problem

Multiple point solutions mean multiple contracts, multiple integrations, and no single source of truth.

USE CASES

Invoices & POs

Contracts

Healthcare Records

HOW INTELIEDOCS FIXES IT

One platform for every document type

Build classification, extraction and summary models for any document — invoices, contracts, forms, records — without writing a single line of code.

Up and running in 30 minutes

One 30-minute training video is all your team needs. No specialist knowledge, no lengthy onboarding, no consulting bills.

100% accuracy, guaranteed

A built-in validation interface lets your team review every extraction before it reaches your systems — every single time.

Secure, compliant and flexible

Multi-model personas control data access per user role. Deploy in a private cloud for full data sovereignty and GDPR compliance.

Scales with your business

Built on Kubernetes and Docker — handle any volume, from a handful of documents to millions, with no performance compromise.

"Simple, affordable and compliant AI that just works — replacing complexity with clarity across every document workflow."
