CONTRACT SENTINEL IS...

Nine capabilities in one platform

- | | | |
|---|--|---|
|  Contract repository
A single source of truth for every agreement. |  Collaboration tool
Bring clients, suppliers and teams together. |  Performance management
Measure performance, risk, cost and SLAs. |
|  AI & ML prediction
Predictive failure technology spots issues early. |  Conversational AI
Ask questions of your contracts in plain English. |  Sell-to-buy contracts
Link the contracts you sell to the ones you buy. |
|  Spend control
A control system for managing contractual spend. |  Development platform
Build systems to manage any type of contract. |  Auto document capture
On-board contracts and documents automatically. |

WHY CONTRACT INTELIENCE

Success depends on three things

Around 60% of spend is tied to suppliers through contracts and 90% of income sits within a contractual framework — yet contracts are complex and costly to manage.

Contract Intelligence

A single, searchable source of truth across every agreement.

Obligation Management

Track deliverables, dates and commitments end-to-end.

Contract Compliance

Stay aligned with regulatory and contractual rules.

USED ACROSS MULTIPLE PERSONAS

Every team, one contract landscape

Executives (CEO/CFO/Legal)

View the contract landscape with cost and performance views across the business.

Procurement

Onboard contracts, request new suppliers and verify costs & conditions.

Finance

Invoice matching to terms, track contractual vs actual spend and manage SaaS consumption.

Legal

Contract creation, repository, compliance, SaaS contracts and Legal LLMs.

Operations

Facility management, assets under warranty and connecting assets to contracts.

Customers & Suppliers

Portals to view the landscape, onboard, renew, change and comment on contracts.

USERS, FEATURES & DEPENDENCIES

How everyone connects

Supplier Portal

Suppliers connect via a portal or askelie access to sell contracts and internal services.

Role-based askelie Access

Tailored access for execs, sales, procurement and stakeholders across the organisation.

Customer Portal

Customers connect via a portal or askelie access to view and manage their contracts.

Services Module

Connects supplier contracts to sales or internal service contracts, end-to-end.

SERVICE INTEGRATION & MANAGEMENT

A unique end-to-end view of the service

The SIAM module links supplier contracts to sales contracts for clients or internal services — one connected view of performance, income, cost, services and billing.

End-to-end service view

See performance, income, cost, services and billing together.

Conversational queries

"What is the current spend for the HP contract?" — just ask.

Supplier-to-sales linkage

Connect what you buy to what you sell or deliver.

Spend & performance

Track spend and service performance by contract or supply chain.

BENEFITS

Value for clients and suppliers

For Clients

- Centralised dashboard, repository & workflows
- Visibility of dates, renewals & exit clauses
- Quick retrieval of contracts and terms
- Consumption-based billing clarity

For Suppliers

- Give clients greater transparency
- Deliver cost-effectively, meeting SLAs/KPIs
- Build stronger client relationships
- Make it easier to do business with you

KEY TAKEAWAYS

Every agreement becomes an asset.

Contracts drive spend, income and risk — but are too often hidden in silos. With Contract intELIEgence, every agreement is controlled, measured and delivering value.
