

FROM DOCUMENTS TO OPERATIONAL INTELLIGENCE

Contracts, working as operational intelligence.

Most organisations have valuable information locked inside their contracts — but very little of it is operationalised. Contract intELIEgence changes that.

VISIBILITY

GOVERNANCE

PERFORMANCE

THE VALUE YOU'RE LOSING

Value locked inside your contracts

01 Revenue & value leakage

Negotiated commercial terms are rarely realised after signature.

02 Poor contract visibility

Obligations, renewals and conditions sit unseen across systems.

03 Missed obligations & renewals

Commitments and key dates slip, triggering risk and lost leverage.

04 Fragmented contract data

Contract information is scattered across emails, PDFs and legacy systems.

Negotiated terms, obligations and commitments are signed — then quietly lost between contract and delivery, eroding margin and increasing risk.

“

Traditional CLM stores contracts. Contract
intELIEgence **operationalises** them.

We transform static documents into operational and commercial intelligence — so commitments are actually delivered.

OPERATIONAL & COMMERCIAL INTELLIGENCE

Four outcomes that move the needle

Reduce value leakage

Ensure negotiated terms and pricing conditions are realised, not eroded.

Manage obligations & compliance

Track obligations, renewals and regulatory requirements automatically.

Strengthen performance governance

Connect contractual commitments to operational execution and oversight.

Improve visibility & decisions

See spend, performance and commitments across every agreement.

BUILT FOR EVERY LEADER

One platform the whole C-suite values

CFO

CARES ABOUT

Margin protection, forecasting, governance & visibility.

Reduce value leakage and gain visibility across contracts, obligations and spend.

COO

CARES ABOUT

Operational execution, service delivery & compliance.

Ensure contractual commitments translate into operational execution.

CPO / Procurement

CARES ABOUT

Supplier performance, spend control & renewals.

Improve supplier governance, renewals and spend control.

CIO

CARES ABOUT

Integration, data visibility & AI enablement.

Connect contract data across ERP, finance and operations into one layer.

TRY US FOR FREE

From static documents to measurable performance.

Contract intELIEgence ensures contractual commitments, service obligations and compliance requirements are consistently delivered — protecting revenue and reducing operational risk.
