

POWERED BY ELIE

What is Contract intELIEgence?

Contract intELIEgence transforms contracts from static documents into operational and commercial intelligence — helping organisations reduce value leakage, strengthen governance, manage obligations and make better decisions.

OPERATIONALISE

GOVERN

DECIDE

OPERATIONALISING YOUR CONTRACTS

From static documents to live intelligence

Traditional CLM stores contracts. Contract intELIEgence operationalises them — turning signed commitments into delivered outcomes.

Reduce value leakage

Ensure negotiated commercial terms are realised, not eroded after signature.

Manage obligations & compliance

Track obligations, renewals and compliance requirements consistently.

Strengthen performance governance

Connect contractual commitments to operational execution and oversight.

Improve visibility & decisions

Unify visibility across contracts, obligations, spend and commitments.

BUILT FOR EVERY LEADER

One platform, every stakeholder

CFO

CARES ABOUT

Margin protection, forecasting, governance & visibility.

Reduce value leakage, improve governance and provide visibility across contracts, obligations, spend and commercial commitments.

COO

CARES ABOUT

Operational execution, service delivery & compliance.

Ensure contractual commitments translate into operational execution through connected visibility and automated oversight.

CPO / Procurement

CARES ABOUT

Supplier performance, spend control, renewals & visibility.

Improve supplier governance, renewal management and spend control through connected contractual intelligence.

CIO

CARES ABOUT

Integration, data visibility, AI enablement & modernisation.

Connect contractual data across ERP, procurement, finance and operations to create a unified intelligence layer.

THE CONTRACT LANDSCAPE

Complex, costly & under pressure

01 Complex & costly

Contracts are complex and costly to manage at scale.

02 Consumption pricing

Pay-as-you-go models create added pressure on cost control.

03 Every contract carries risk

Without monitoring, risks quickly become operational issues.

04 Contracts span the org

They run across the whole business, not just procurement.

Around 60% of spend is tied to suppliers through contracts and 90% of income sits within a contractual framework. Clients demand higher performance, and the shift to consumption-based models makes cost control critical.

60%

OF SPEND VIA CONTRACTS

90%

OF INCOME IN A FRAMEWORK

WHERE ASKELIE FITS IN

Connected contractual intelligence

Onboarding

Automates supplier and ESG document checks, with validation and duplicate detection.

Compliance & ESG

Ensures every contract meets regulatory and ESG requirements, with full audit trails.

Change Management

Tracks, validates and automates workflows for variations and approvals.

Performance Monitoring

Captures KPIs and renewal data, giving leaders real-time insight.

WHY CONTRACT INTELEGENCE

Turn commitments into measurable performance.

Contract intELIEgence protects revenue, strengthens governance and gives every leader visibility into the commercial performance of contractual relationships.
