

INTELLIGENT AUTOMATION FOR LEGAL

Smarter, faster, more efficient case management.

An autonomous-ready solution built on ELIE — automating onboarding, suitability scoring, triage and case progression, right alongside the systems your firm already runs.

THE LEGAL LANDSCAPE TODAY

Manual, fragmented & under pressure

01 Onboarding delays

Manually collecting and checking client documents slows delivery and frustrates clients.

02 Risk blind spots

Suitability and risk assessments vary by lawyer, creating inconsistency and exposure.

03 Admin overload

Skilled paralegals are stuck on repetitive intake instead of case preparation.

04 Inefficient triage

Hours are lost filtering public enquiries that never convert to instructions.

Today, Legal teams juggle disconnected systems and manual work — slowing delivery, inflating cost and quietly building risk into every step.
