

AI-NATIVE DOCUMENT INTELLIGENCE

Classify. Extract. Understand any doc.

intELIEdocs is the world's leading AI-based IDP platform — built for any industry, any document type and any extraction need. Deploy in minutes, no code required.

100% ACCURACY

30-MIN SETUP

ZERO CODE

THE PROBLEM

Legacy capture is costly & fragmented

Traditional capture tools demand expensive consultants, handle only the simplest documents, and leave teams juggling disconnected systems.

100%

ACCURACY VIA VALIDATION

30min

TO GET STARTED

01 Consultant-heavy

Legacy tools need expensive consultants to define classification and extraction models.

02 Invoice-only

Most tools only handle invoices, leaving complex documents to slow manual input.

03 Fragmented stack

Organisations end up with disconnected capture solutions and spiralling SaaS bills.

04 Error & risk

Manual rekeying introduces errors and compliance exposure across the business.

CORE CAPABILITIES

Everything you need to turn documents into data

No-Code Model Creation

Build classification, extraction & summary models without a single line of code.

Multi-Model Personas

Different models per persona, strengthening GDPR compliance and access control.

Validation Interface

Human-in-the-loop validation delivers 100% accuracy before data leaves the platform.

Any Volume, Any Doc

No volume too small or large; group documents handles mixed batches effortlessly.

Built-in Consumption Billing

Automated usage tracking and billing built directly into the platform.

Private Cloud Available

Full private cloud deployment for ultimate data sovereignty.

FLEXIBLE PRICING

Priced per document — pay only for what you use

Simple, volume-based pricing built around document models. Estimate your exact cost and ROI with the online cost calculator.

PER DOCUMENT

Pay per use

one model = one doc type

VOLUME DISCOUNTS

Scales down

lower cost as you grow

COST CALCULATOR
